

**2X ApplicationServer**  
*New Version 4.1 - Out Now!!*

2X develops enterprise server based computing software that allows desktop virtualization and application streaming on standard PCs and thin client devices. Unlike hardware-based thin client companies, 2X is vendor independent and will not tie you in to specific hardware or operating systems. 2X's server based solutions enable your business to run secure and manageable products, that don't become obsolete over time. Protect your investments today and in future with 2X!
